
Business Outreach Survey

The Village of Oswego’s Economic Development Director is tasked with helping business in Oswego. This includes working with business owners already invested in Oswego to learn more about their business’ needs and challenges, offer resources, and remove barriers to growth. This could include changes at the local level, but also includes advocating for policies that help businesses at the state and Federal level. Our staff would like to meet with you to speak confidentially about your business and how we can help it grow.

What are the top three improvements (or barriers that could be removed) that would make your business more successful in Oswego?

- 1. _____

- 2. _____

- 3. _____

At the local level (Village, county, state, a local utility, or any other local agency), is there a policy or policies that are hurting your business that you would like to see addressed? Examples might include a local ordinance that prohibits you from selling a certain product, a burdensome fee or paperwork process that makes your business less efficient.

Is there something specific that the Village or another local agency could be doing that would fulfill a need for your business or help your business grow?

Would you like us to contact you to schedule a visit to your business? Yes No

If you would like to speak with someone about the business climate in Oswego, please contact:
